Curriculum vitae

Goals

My current goal is to get the opportunity to work as a designer for any company that wants to let me show my creativity and really be part of the development of a new game, as I'm confident that I have the right skills and experiences to really contribute to any genre of games. As a more long-term goal, I envision myself as a lead designer for a company that develops AAA titles.

Qualities

My experiences in extensively playing nearly all game genres has given me the confidence to work with any type of game, and I long to get the opportunity to really push my knowledge to its limit to produce fresh ideas and games. I have a very strong interest for gameplay mechanics, and I'm always eager to learn more about that passion. I learn new software quickly, and I love being part of development projects and always do my absolute best to make sure that it becomes a success.

During my time in the business, I have done several tasks, including:

- Community Management
- Research
- Story Writing
- QA

These all aid in my ultimate goal to be a good designer and asset to the company.
